Cash management Solutions

Your "one stop" bespoke solution partner

We take care of your cash transactions. We make the checkout process easier for cashiers and customers.

coinmasters

Total control over your cash? It's possible!

Modularity

The CashManager solution can be connected to any Point of Sale (POS) system. This gives you the possibility to integrate the CashManager with your current checkout hardware.
Intelligent Control

The software assures a balanced dispensing of cash. Based on the cash content, the system decides which denominations are best suited to be dispensed to the current customer.
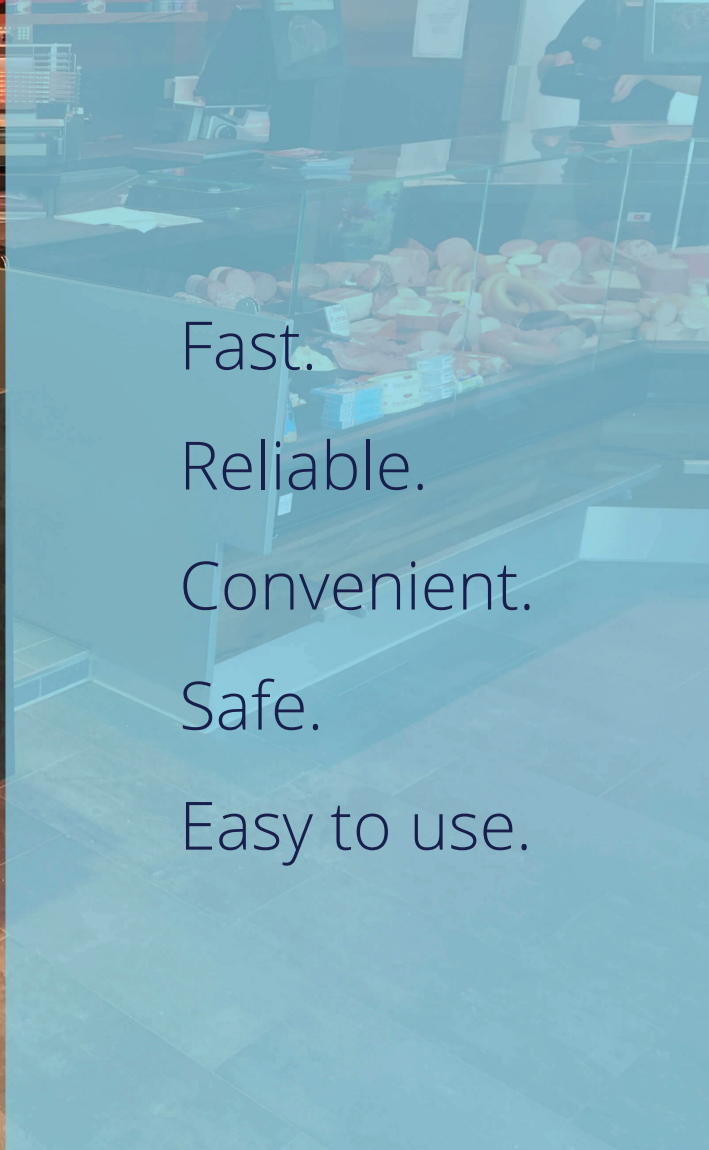

Secure

Replenishing cash content when needed and extracting excess cash content accumulated during the day is performed fast and automatically.

Cash Recycling

Banknotes as well as coins are processed by sophisticated recycling techniques. Every note or coin that is inserted in the system is immediately available for dispensing.

Fast.

Reliable.

Convenient.

Safe.

Easy to use.

Integration Solutions (Software)

Low

Integration time

Very Low

CashManager (Since 2006)

The CashManager application runs as an invisible background service that works as a slave. To initiate a payment, the POS application only has to send a single message.

CashConnector (Since 2017)

The CashConnector is an intermediate application that provides administrative tasks, these no longer have to be implemented by the POS.

OCR (Since 2019)

The OCR makes integration now even easier than before. The OCR can read the amount that needs to be paid. <u>No</u> integration is needed!

Remote Management (Software)

An advanced Back Office Module makes it possible to monitor the status of several CashManagers in your store(s) simultaneously. The back office module utilizes a database where all cash transactions are preserved. This database shows you the historic and current cash flow, logged in staff, details on device filling and emptying procedures, dispensed and dispensable cash, and more.
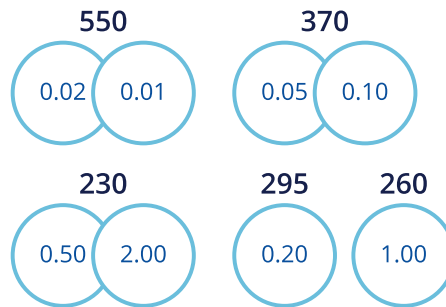

Coin Recycler

 coinmasters

Supported currencies:

€, $, ¥, £ and many more

Up to 60 mixed coins **bulk acceptance**
